PROJECTS

Video Surveillance (VMS)

- An end-to-end encrypted cloud service that brings you home monitoring powered by artificial intelligence. Video Management System plays the vital role of collecting live video feeds from cameras then record and stores into a storage device. More importantly it provides an interface to view those live videos and access to the pass recorded videos.

ACHIEVEMENTS

- Honored with "Excellence performer award" (11/2021)
- Participated in a college project on Industrial Automation
- Received "Most disciplined student" award in school
